Udacity

Product Evaluation System based on Opinion Mining of Customer Reviews

BTP project

Extract features from the product reviews, determine the semantic orientation, scoring the opinion positive, negative or neutral, review summarization and scoring, result using Data Visualization.

EXPERIENCE

Intern at 99aces.com

Apr 2017

Developed improved version of View Similar Property recommendation listing to be shown on property description page. Worked closely with product dev and data analytics team to come up with optimized way to show VSP.

Intern at Joshtalks

Jan 2017

Worked as a Web developer intern at Joshtalks.com where my role was to plan and implement initial phases of complete website revamp of joshtalks.com

Intern at Zapplon

Jun 2016 - July 2016

Worked on **Recommendation System** for cab booking for Zapplon app and BackEnd in Java. Also proposed and worked briefly on offline cab booking.

SKILLS

Languages: C/C++, Python, SQL, PHP, HTML, CSS, Javascript(jquery)
I am a Full Stack Developer. Have worked and currently working on projects on Web Development.

HACKATHON PROJECTS

DERMA SCAN:

SMART INDIA HACKATHON

First Runner up

Was a part of team of 5 that won **first runner up** prize in SIH. Built a web app for Ministry of AYUSH that can help doctors and patients to detect skin disease type by clicking a photo and submitting it. Backend and frontend was done by me.

MagicBot:

MAGICBRICKS BUILD-A-THON

First Prize

Build a chatbot for "Messenger" app powered by text processing, nltk, and custom filters. Also build a powerful REST API in flask framework (Python) that integrates webhooks and communicates with facebook.
